Environment Canterbury,
Re Transport Public.

Why should Ratepayer have to cough up \$4m short fall when you allowed the problem to eventuate. The council has caused this short fall themselves by shifting patronage from Buses to cycleways what business would ever consider this move would I believe, be incompetent and should be stood down.

Your short fall would be easily fixed by stopping cycleways construction. I would have thought this a easy solution NOT rate payers.

I wonder if councillors would like to donate \$10 week from pay until short fall \$4m paid of

Option Public Transport
