Public Transport Options

Public Transport is one of the programmes in the Transport and Urban Development portfolio. For the first year of the Long-Term Plan 2018-28 we are proposing changes to the Public Transport programme as outlined in the **Consultation Document**. (on page 14)

To make comment on the Public Transport proposed changes please complete the selection panel below.

To make comment on the the whole Transport and Urban Development portfolio, please use the tab on the left.

Please review the options in the Consultation Document and indicate which option you support: Option 4 – none of the above. (Please provide comment/ideas for an alternative solution)

Public Transport Comments

Please provide any comments.

I reject the three proposed options to make changes to the public transport system. (These options are undemocratic in that all three include removing bus routes and reducing the Total Mobility subsidy).

Can ECan please provide more information on patronage data, projections and the effects of fare increases to help the public make an informed submission.

I reject the discontinuation of the six lowest performing bus routes and the increase in bus fares. Can ECan please re-evaluate the farebox recovery policy and to start recognising public transport as an investment with numerous social benefits and long-term economic benefits, not to mention a crucial part of reducing transport-related carbon emissions.

I reject the proposed reduction to the maximum Total Mobility subsidy per vehicle trip from \$35 to \$30. Services for those with disabilities should not be cut unless viable alternatives are offered and until public transport is made more accessible to all.

Hazards, Risk and Resilience Support/Oppose

See page 10 of the Consultation Document.

Please select one of the following: I generally agree with the activity proposed for Hazards, Risk and Resilience.

Hazards, Risk and Resilience Comments

Please provide any comment.

I Support the new Climate Change Integration programme, but it should also include a focus on long term mitigation goals and receive substantially more funding.

Can ECan please develop this programme further into a climate change portfolio alongside its other five major portfolios.

Transport and Urban Development Support/Oppose

See page 13 of the Consultation Document.

Please select one of the following: I generally agree with the activity proposed for Transport and Urban Development.

Transport and Urban Development Comments

Please provide any comments

I support freight mode shift from road to rail and shipping as part of the Regional Transport programme, as this shift will reduce our transport-related carbon emissions.
