Consultation P 27  
& more dense P 270

Submission on the Longterm Plan of ECAN 1/3  
Canterbury Regional Council

I have read the plan (both plans)

The councillor need to be all  
elected - We need ~~our~~ our ~~secure~~  
democracy back, for all councillors (P 9)

We need indigenous biodiversity

You allot at present a pitiful  
amount for indigenous biodiversity

You could allot (double the

funds (and it would be a  
pitiful amount) (P 4 + P 8 + P 28 <sup>of the 270 plan</sup>)

I would like you to double  
your funding and perhaps

(triple it or more over time.)

Pests (animal & plant) <sup>P 115</sup> should ECAN

take more responsibility YES

indigenous - biodiversity. Other wise we will have no  
indigenous biodiversity left.  
The ~~budget~~ is only 7% of the

budget. P 106 of the denser plan (370 ~~344~~ pages)  
It needs to be more. It needs.

I am ambivalent on the Pest Rating (P 165)  
(longer plan) It was NOT announced in the  
shorter plan called the Consultation document  
page 17 of the shorter plan.

I am decided that that pouring <sup>3/4</sup> water  
on Canterbury's porous soils is not  
a good idea

Many of the submissions to Hurunui  
District Plan were Against Irrigation

Just about more submissions were against irrigation  
than for and many farmers would have  
lost money by backing irrigation + then  
pulling support for irrigation

I do not like the tone of the  
~~speech~~ writing at the top of P106 of  
the longer plan not the consultation plan

It is not reason to pollute  
the river or a bore and then clean  
it up

I do not like the General Rate for water  
charging (verses the targeted rate)  
I should be a targeted rate

You could and should spend more on

Bio security

---

Please remember there is  
a swimming site up from  
where the Boyle River meets the Nana  
River

Witshand  
PO Box 2306  
Christchurch

I believe with the  
exception ~~of~~ those

signing the petition (3000 <sup>people</sup> add) that would effect the reshaping  
the bus route listed could be stopped

The money could be put  
in to ~~the~~ indigenous biodiversity

I have had a siners operation  
in Chch public hospitals  
this year 2018 Feb. & that is  
why my writing is funny
