I am strongly against the proposals of the LTP to cancel bus services and raise fares. Many people rely on these services to get access into the city. The proposed policies are discriminatory against people who need public transport to get around (particularly the elderly and children). ECan must review their policies to make sustainable transport options such as public transport more attractive. If funding is an issue then alternative funding measures such as congestion tax, private vehicle pollution tax, fuel tax or rates increase must be considered. These policies are a backward step and are extremely disappointing.
