<b>Freshwater Management Support/Oppose</b>	
See page 6 of the Consultation Document.	
<b>Please select one of the following:</b>	I generally agree with the activity proposed for Freshwater Management.

### Freshwater Management Comments

#### Please provide any comments.

I would like to see more funding set aside for this area to ensure Ecan has sufficient resources for monitoring of water quality around various quarries and enforcing any breaches.

### Air Quality Support/Oppose

See page 12 of the Consultation Document.

**Please select one of the following:** I generally agree with the activity proposed for the Air Quality.

### Air Quality Comments

**Please provide any comments.**

I would like to see more funding set aside for this area to ensure Ecan has sufficient resources for monitoring of air quality around various quarries and enforcing any breaches. At present Ecan's response to following up breaches of dust (silica) around quarries is they have insufficient resources to be able to monitor & enforce consistently without the public having to be their watchdog - however by the time Ecan investigate the contaminants/issue has passed - the quarries know this and can carry on their operations without any real consequences for any breaches.
