Freshwater Management Support/Oppose

See page 6 of the Consultation Document.

Please select one of the following: I generally disagree with the activity proposed for Freshwater Management.

Freshwater Management Comments

Please provide any comments.

The idea that resource consent for quarries near residential areas can be considered is not good enough. There is more than enough evidence of the negative impact of quarrying on local ground water quality to negate the approval of any quarrying activity within several kms of any residential areas!

Air Quality Support/Oppose	
See page 12 of the Consultation Document.	
Please select one of the following:	I generally disagree with the activity proposed for the Air Quality.
Air Quality Comments	

Please provide any comments.

There should be set back distances of several kms for quarries from residential areas. Also there should be constant monitoring of air quality surrounding quarries. Monitoring that finds dust exiting quarries that doesn't conform with the resource consent should result in extreme penalties for the companies involved!

Transport and Urban Development Support/Oppose

See page 13 of the Consultation Document.

Please select one of the following: I generally disagree with the activity proposed for Transport and Urban Development.

Transport and Urban Development Comments

Please provide any comments

The overuse of roads by heavy vehicles to facilitate quarrying activity in a suburban area or within its surrounds, is despicable! It increases danger to local road users and pedestrians that may include children.
