In the comments section under each portfolio, please tell us what you support/don't support about the planned activity, and if there is anything you would like to see more or less of.

Please view our short Consultation Document and full Long-Term Plan supplementary document on www.ecan.govt.nz.

2. Public Transport Options

Public Transport is one of the programmes in the Transport and Urban Development portfolio. For the first year of the Long-Term Plan 2018-28 we are proposing changes to the Public Transport programme as outlined in the Consultation Document. (on page 14)

To make comment on the Public Transport proposed changes please complete the selection panel below.
To make comment on the the whole Transport and Urban Development portfolio, please go to Q7.

Options

Please review the options in the Consultation Document and indicate which option you support: (please select one answer)

Option 1 – A combination of routes, fares and (targeted) rates changes: small fare and rates increases, reduced Total Mobility subsidy and six routes discontinued. ☐

Option 2 – As Option 1 but larger rates increase, no fare increase: larger (targeted) rates increase, no fare increase, reduced Total Mobility subsidy and six routes discontinued. ☐

Option 3 – As Option 1 but larger fare increase, smaller (targeted) rates increase: minimal rates increase, larger fare increase, reduced Total Mobility subsidy and six routes discontinued. ☐

Option 4 – none of the above. (Please provide comment/ideas for an alternative solution) ☐

Comments:

Keep the bus routes especially 107. (Crematorium & willowbank). Just use vans on all these bus routes and maybe work space them out. However these routes do not have late buses and that's pretty poor for trying to get home from work! That way you would save money.

See page 6 of the Consultation Document.

I generally agree with the activity proposed for Freshwater Management. ☐

I generally disagree with the activity proposed for Freshwater Management. ☒

Comments:

Please treasure our water. Canterbury needs to look after our water. If you're in management please don't support giving millions of ^{litres} away. The water is not going to last forever. How is it no one thought to vote against giving it away overseas. They who profit and sell it and make a profit and then we rose out its eight years and its far too long to suddenly only now having to resort to chlorine. Our water situation should have been priority far earlier 😞

Question 7- Cycleway-
You have made it so difficult for everyday living. Elderly, disabled can no longer park on the same side where they need to park in many cases. They now have long distances to walk and to try and get across very busy, dangerous streets. In the dark many of the cycleway concrete structures are very dangerous to drive by or walk over. There are more walkers than cyclists. What about us?

You have made it so hard for those that live with no extra income to keep warm. To be intitled to a subsidy is humiliating for so many. If you have ever lived with shame you would understand this. Before they could throw a few pieces of wood in the fireplace to keep warm. These new proposals stop this.

Question 2- answer -

ECAN Please read my proposal it could save the bus routes and save you money.

Comments:

The 107 bus route near the Johns Rd Crematorium - Gardiners Rds. There is no other way to get there if you use the bus, as I do. (Also the Wilburbank nearby is frequented by many users and young people going to work there. Also all of the other bus routes have people such as myself who maybe partially disabled or fully so, who can not walk long distances and can not afford the expense of a taxi. It is important to keep people living life, functioning fully and being independent. Keep the services. Maybe cut a few of the times out during the day, but give people transport. Cut out big buses on some and use vans. That way you can save money but still service the people ☺
