Freshwater Management Support/Oppose

See page 6 of the Consultation Document.

Please select one of the following: I generally agree with the activity proposed for Freshwater Management.

Freshwater Management Comments

Please provide any comments.

Enforce regulations already in law and implement your proposals such as trial role of cultural land management advisor (make that plural)

- eg water use historic consent reviews- strongly support and enforce laws if obviously the firms are flaunting them

eg strictly enforce law so as to prevent eg the recent attempts at drilling deeper to get water for bottling and exporting- enterprises must pay the actual costs

eg cows out of rivers- encourage those farmers already fencing off river sides- providing inspections - extra finance eg restoring rivers quality - farmers unsustainable dairy farming and water use

eg Consider each river **individually** and prioritising which - no point in giving water consents upstream yet no consents downstream or vice versa

eg our Heathcote gets dirtied by building sites up the hill not protecting loes run off - as seen in confluence of stream from Wetmorelenad and the Heathcote

eg encourage voluntary Oporganizations painting signs at street drains to show car wash waste goes STRAIGHT into the river - they used to be so some 15- 20 years ago . Plus enforce using inspectors

eg keep up the new regime of NOT cutting all the grass by city river so that slips caused .

Thank you for opportunity to contribute
