

Ready to get your land use consent to farm? Nice one!
We'll help you get started, so you can get sorted this year.

The five steps to getting the thumbs up.

Determine whether you need a land use consent to farm

To determine your nitrogen losses, use OVERSEER®, or the NCheck tool at ecan.govt.nz/farmers-hub.

Prepare your nitrogen baseline

All farms requiring a land use consent to farm need to prepare a nitrogen baseline. If you need consent, contact your nutrient advisor for help, as you'll need to provide your baseline as part of your Farm Environment Plan (FEP). We know there may be a delay for these to be completed, so let us know when you are on the waitlist to get yours done.

Create your Farm Environment Plan

All farmers requiring a consent to farm will need to prepare a FEP.

Approved templates and industry help available at ecan.govt.nz/farmers-hub.

Apply for your land use consent to farm

Ready to apply for a resource consent? We offer a free one hour pre-application consultation to help you prepare. See ecan.govt.nz/farmers-hub for information.

Implement Good Management Practices on your farm

Your Primary Industry Sector has a set of agreed GMPs that can be used to improve water quality. Take a look at ecan.govt.nz/farmers-hub for help relating to your own industry.
