Information about this resource consent process, including any details relating to a hearing may be sent via email

☐: - Please tick this box if you do not wish to receive communications via email.

Consent application number/s: **CRC190445**

Name of applicant: **Christchurch City Council**

- ☐ I/We do not support the above application
- The reasons for making my submission are: *(state in summary the nature of your submission, giving reasons)*

- Growth and Development ; No Area Plan has been completed for the receiving environment Lower Styx Catchment
- Stormwater Ponds : The Non notified basis for stormwater ponds fails to recognise that there are
- Informing reports and information provided for the CRC160056 and CRC 190445 consent are incorrect ; Brooklands has not been abandoned and increase in the acceptable flood risk to the area is not acceptable
- The CCC Long Term Plan has no budget for the receiving environment Lower Styx Catchment
- There has been no remediation of earthquake damage to stopbanks ,river beds , changed and there are no capital works planned to remediate the earthquake damage in the Long Term Plan
- Monitoring - while monitoring may be taking place - there is no Action planned if targets are not met.

7. I wish to address : Land & Water Drainage Plan/Policy

a) P 41-42 LAND & WATER DRAINAGE POLICY

Christchurch Earthquake Recovery Authority (CERA) The Christchurch Earthquake Recovery Authority (CERA) was established as a new government department in April 2011, to lead and coordinate the ongoing recovery effort following the Canterbury earthquakes, consistent with the purposes, functions and powers established in the Canterbury Earthquake Recovery Act 2011. Canterbury Land and Water Regional Plan Page | 24 The purpose of the Canterbury Earthquake Recovery Act 2011 includes providing appropriate measures to enable recovery, to enable a focussed, timely and expedited recovery, and to restore the social, economic, cultural and environmental well-being of greater Christchurch communities. CERA's role ceases in April 2016, but recovery activities will continue beyond this time. This Plan will play a key part in the earthquake-related management of land and water resources.

b) I wish to address 9.5.7 Land & Water Drainage Plan /Policy

c) No earthquake remediation, no mitigation of effects of growth and development in the upper Styx catchment on the Lower Styx catchment, no area plan, no capital works in the Long term Plan – and yet the receiving environment are bearing the economic loss, community well-being degradation, loss of values, health and wellbeing neglected in the Lower Styx catchment communities

d) Economic power in the receiving environment Lower Styx Catchment is eroded away by regulation and neglect - the systematic flooding of properties takes away the means by which individuals can shield themselves from risk, hazard and economic viability.

8. CCC state the base flow of the river has not changed - but the water levels are getting higher. CCC appear to have no answer as to why.

Community concerns that this is due to growth and development in the upper reaches of the Styx Catchment are ignored.

9. Stormwater Ponds - non notified biases is causing harm and hazard to communities and individual properties. Designs have no social conscience

10.

3. I wish the consent authority to make the following decision:

(give details, including the general nature of any conditions sought. Please attach additional pages if required)
