PE20121022	27/03/2012	27/03/2012	16:00	Event Substantiated			Smoke from burning	Caller rang to lodge a complaint about excessive smoke. Smoke has been covering Hororata over the past two days. Currently still visible was worse pm - 26th and am - 27th March. Caller believes the smoke is coming from quarry - corner of Plantation Road and Thwaites Road. Smoke is white.	1
PE20152998	1/07/2015	1/07/2015	12:40	Event not Substantiated			Rubbish/waste/offal	12.40pm - Afternoon Pollution Hotline: Caller called in regards to a quarry/gravel extraction area that Frews Contracting have in Hororata. Caller didn't have any consent numbers or property address of the site in question. Caller wished me to relay a message in verbatim "I have been watching Frews Contracting in respect to the quarry operation they have there. I would appreciate a follow up in the consent condition, that the operation is back loading general waste and rubbish obviously from demolition sites in the City. Today I have follow a large Frews contacting truck and trailer unit general spoil and rubbish including branches and tree stumps from the City to the quarry site and is this allowable under the consent. Are they allowed to back fill" - with this material. Caller doesn't need to be contact, given they haven't left their details but would like this looked into.	1
PE183235	9/11/2017	9/11/2017	8:37	Event not Substantiated	Provided Education	Road was watered before able to attend.	Dust	09/11/2017 07:37am - A Frews Truck came out of their Quarry Entrance, 61 Savills Rd, Yaldhurst, they were dragging dust out of their driveway and out onto the Road, their Driveway needs to be wet or clean.	1
PE184261	31/01/2018	30/01/2018	17:00	Event not Substantiated	Unable to Attend	RES 07/03/18: not attended at the time, closing for reporting purposes	Dust	31/1/2018 2.15p.m. Email received: 30/1/2018 Coming home from work on pound Rd I go past kbs, Isaacs, Fulton Hogan, Harewood Graves and Grew there is a lot of dust billowing into the air. All it needs is a bit of wind and we get covered I'm it. Unimpressed where is the dust mitigation??	1
PE185131	20/04/2018	20/04/2018	14:00	Event Substantiated	Verified but Compliant	A weather front has moved through the area and generated dust everywhere	Dust	20/04/2018 03:00pm - [Dust from quarries] - Dust from multiple quarries around Guys Road. Caller referred to these quarries/companies: Isaacs, KBs, Harewoods(?), Fulton Hogan, SOL, Frews. Caller came home an hour ago and can see dust coming form these sites. They think the quarries should not be operating due the current strong winds, but have seen trucks coming from KBs and Frews. Caller said they think it's pointless calling us as we don't do anything and the only person who has ever called him back is the guy who fills in ("a credit to him"). Caller couldn't give me his name. Otherwise Caller does not get any call backs. Hence I've listed this as complaint.	1
PE184274	1/02/2018	1/02/2018	12:05	Event not Substantiated	Unable to Attend	RES 07/03/18: no record to show attended or email sent, closing now for reporting purposes	Dust	01/02/2018 12:05pm Customer rang to complain about the amount of dust that is blowing around from all of the quarries in the area of Conservators Raod, Yaldhurst. He mentioned, Frews, SOL and Fulton Hogan. ** Call 2** 2/2/2017 11.00a.m. Email received 1/02/2018 6:01 p.m. Hi, I'm looking to make a complaint about dust leaving the boundary of Sol Quarry on Guys Rd/Conservators Road. Dust plumes are visible above the quarry and are visibly leaving the boundary (witnessed 5:15pm). Dust also blowing off haul road. No visible dust suppressant in use. Areas clearly not wetted down. I understand the consent for this property notes that when the wind speed exceeds 5m/s (10knts) the applicant should water down and apply dust suppressant to unconsolidated areas, this has not occurred with wind speeds this afternoon averaging between 24knts - 28knts with gusts much higher than this and the quarry still operating. I also note that quarry operations should cease over 10m/s (20knts) this doesn't appear to have occurred. With the average wind speed tomorrow (2 Feb) being forecast at over 20km/h (10knts) all day, please can you confirm tomorrow morning that the quarry has applied dust suppressant (as forecast is for more than 5m/s) and shut down activities when the wind speed exceeds 10 m/s. Wind speed readings noted have been taken from airport 6.5kms away from quarry location. Please respond via email to confirm.	2
PE184007	15/01/2018	15/01/2018	8:00	Event not Substantiated	Unable to Attend	RES 07/03/18: after hours, not attended, closing for reporting purposes	Dust	15/01/2018 05:03PM - Nor East wind so dust is coming from that direction. Bad dust today. Dust all over paddocks and washing. Callers skin is gritty.	1
PE20101609	11/05/2010	11/05/2010	8:00	Event Forwarded to another Agency			Rubbish/waste/offal	Since the weekend, and every morning since he has noticed a pile of demolition waste being dumped at the Teddington Quarry, seems as though he has seen Frews Demolition dumping their waste into Teddington Quarries so they can bury it with the clean fill they have just been granted consent to bury.	1
