

PE Number	Date reported	Incident Start Date	Incident Start Time	Overall assessment of event	Event outcome	Final Comment	Type of Incident	Description of Incident as reported to Environment Canterbury	No. Reports per Day COMPLETE	Activity Date CHECKED	Activity Type	Response
PE20111014	15/04/2011	15/04/2011	14:45	Event Substantiated	Written Warning		Smoke from burning	Outside fire from the quarry KB Contracting and Quarries Ltd.	1			
PE20130918	15/03/2013	15/03/2013	8:00	Event Forwarded to another Agency			Dust	Dust from KB Quarries, Tanya Street.	1			
PE174594	28/04/2017	28/04/2017	10:44	Event not Substantiated	Verified but Compliant	Confirmed excavation depth is compliant with consent conditions.	Sediment	28/04/2017 10:44am - Received email: "Kbs quarry off McLeans island road.. flowing water and lakes forming at base of pit.. rising from below the ground. Truck at loader movements all threw it contaminating ground water. Dump trucks trying to hide it currently by tipping dirt over it!!"	1			
PE174636	3/05/2017	3/05/2017	8:00	Event not Substantiated	Verified but Compliant	Confirmed quarry floor (excavation depth) was compliant with consent conditions.	Sediment	3/5/2017 8.26a.m. - [KB QUARRIES, MINERS ROAD, DUG TOO DEEP] - Caller reported KB Contracting and Quarries dug too deep to the water table, similar to what Winstone quarries did some time ago. They are currently backfilling. Its their quarry on Miners Road. 95 Miners Road.	1			
PE174791	17/05/2017	17/05/2017	8:00	Event not Substantiated	No Environmental Impact	Site visit carried out no stream visible, surface water ponding has retreated substantially since last inspection ~ 2 weeks ago	Sediment	17/05/2017 10:15 AM For the last two weeks trucks have been moving through what caller thinks might be a stream at the quarry at 571 McLeans Island Road, Chch. The waterway is located at the northern boundary of the quarry site which is the end near the firing range adjacent. Caller doesn't know whether it's natural or not, but says it always flows and disappears into the ground. So based on that thinks it might be natural. I can see nothing on GISmo at the area described. The property is owned by KB Contracting and Quarries Limited according to GISmo.	1			
PE182039	19/07/2017	19/07/2017	19:00	Event not Substantiated	No Environmental Impact	Satisfied that there is no dust from KB quarry gravel processing. All material is damp in processing is occurring within the quarry.	Dust	19/7/17 06:58pm Snap Send Solve.Location: On Conservators Road, McLeans Island, Christchurch. Notes: At 9.30 this morning, there was haze over our paddock coming from the KB quarry with a distinct smell of crushed rock. Can we get an air monitor to help determine the make up of the dust?	1	9/08/2017	Note	not substantiated
PE182947	17/10/2017	17/10/2017	8:50	Event not Substantiated	No Environmental Impact	CE: made site visit and spoke with the quarry manager. Works were being undertaken to reduce the large areas of standing water at the site which would breach one of the consent conditions re not providing conditions that would encourage birds to the area.	Unauthorised structure/disturbance	17/10/2017 8:50am caller advised that K B Quarries have hit groundwater at their McLeans Island site, and the water level can be seen visibly rising at the site. They are currently backfilling the area with material. Caller has noticed at time of call. If you head down the ramp at the site you can see the area, and there is an area directly opposite which appears to have been backfilled also.	1	25/10/2017	Note	not substantiated.
PE20142255	9/06/2014	9/06/2014	8:00	Event Forwarded to another Agency			Rubbish/waste/offal	Caller rang at 12.20pm to advise that this quarry completely disregards its resource consent conditions. The piles are more than 3m high, trucks are constantly dropping rubbish on the road which is now causing a traffic hazard and there are truck movements every 3 minutes. Caller also advised that there was a lot of activity at night. Caller would like to be rung back when something has been done about this.	1			
PE20142688	4/07/2014	4/07/2014	8:00	Event not Substantiated			Dust	Caller rang to complain about the piles of gravel that are too high at KBs Contracting at 4 Tanya Street, Bromley. He rang to advise that this quarry completely disregards its resource consent conditions. There is a lot of dust from the site. The trucks are constantly dropping rubbish on the road which is now causing a traffic hazard and there are truck movements every 3 minutes but the caller realizes this is a CCC issue and as such has taken it up with them. Caller also advised that there was a lot of activity at night. He believes that at night the workers 'sneak' into the yard and process rubbish as if they are a transfer station. The smell from the rubbish is horrible. Caller would like to be rung back when something has been done about this.	1
