I do not understand why people out of the clean air zone can burn polluting fires - there is 1 atmosphere around the earth - where ever you put pollutants into it will damage the atmosphere. The current policy looks after isolated areas of air pollution without looking at

what is affecting peoples health in the wider environment.

I generally support the plan for Transport and Urban Development

Ecan have a statutory responsibility for controlling pests Many people have been controlling rats, mustelids, possums, rabbits, wasps, hedgehogs, magpies, weeds etc with absolutely no assistance from Ecan apart from elaborate nascella tussock communications for many years. All this has involved a lot of our time and money. Central government has now set up a large national organisation "Predator" free NZ, funded by our taxes. Ecan became part of a joint organisation Pest Free Banks Peninsula...but we weren't consulted. I want to know precisely how the money is planned to be spent. The focus of Pest Free Banks Peninsula has not been related to my location. It has largely been on farmers, who make up most of it, and Corporates, who put a minuscule amount into this compared with what they pay their CEOs. I also want to know why Can and Pest Free Banks Peninsula don't get money for this from "Predator" free NZ...like lots of other people and organisations are doing. I also don't think we need another structure with paid bureaucrats to do the same work.

If you have any additional comments on the Revenue and Financing Policy please provide them below.
