Reasons comment:

The proposed quarry land is located in the very close proximity to Samadhi Buddhist Vihara which is a religious place. The location for the vihara was selected due to its' calm and quiet environment as its' main programmes are related to buddhist mediatation, mindfulness activities and other religious events where really calmer environments are appreciated. I am a mother with two kids where as a family using the Samadhi Buddhist Vihara premises very frequently. My two kids are attending to Srilankan Language and Cultural school which held at the premises every Sunday morning for three hours. As a family we always stay there for the whole time till they finish to go back home. Like our kids there are lot of other families where we all send our children to here for the language and cultural school. Extra to the planned lesson activities at the school, currently children are enjoying a lot playing together and socializing among the SriLankan community kids at the premises after and before the classes. With the potential health hazards which are feasible with the proposed quarry, as parents we have a big concern too. We do not want the kids to be surrounded with the potential dust and noise which could caused by this project. And also with the extensive period of proposed, the water contamination is also a big concern for us. Currently children are enjoy the hazard and contamination free environment at Vihara. Overall I would like to submit this to say that please re-consider the above proposal by the vicinity of our Vihara which is going to cause lot of health and environmental impact to our community premises.
