Reasons comment:

The proposed quarry is too close to the township of Templeton. Third world countries require greater setbacks for quarries from residential areas than we do. Silica dust from the quarry will blow towards Templeton in a southerly. There is a real risk of water contamination to local residents' shallow bore wells. A private company's profit should not come before the health a wellbeing of the residents of Templeton.

Consent comment:

Decline all consent applications. Failing that, impose conditions limiting operations to normal business hours, impose a decibel limit, impose a truck movement per day limit, have FH install roading to bypass Templeton, have FH pay for independent well water quality monitoring with operations to be shut down if contamination is found
