Reasons comment:

1. It will allow a continuation of high quality aggregate supply that is essential for the growth predictions of the future of the region. 2. The fact that 90% of the truck movements from the proposed site will go directly to State Highway 1 is really beneficial to the current congested traffic flows on the rural and minor roads. 3. The infrastructure in and around Christchurch needs continual work and the continued supply of high quality aggregate will help to meet these needs. 4. Fulton Hogan are an operator who cares for the environment and they will ensure that there is first class dust suppression. 5. The proposed building of the bunds will enhance the landscape for the site, it will also ensure the noise does not travel. 6. The smaller open areas of the site will make it much more appealing than the current big open quarries.
