**Reasons comment:**

poor air quality and noise pollution generated will no doubt leads to illnesses mainly respiratory. This will be a burden on health system and the tax payer bears the burden while this company is benefiting with profits. Another disadvantage is the cracks that will definitely appear as a result of the quarry and movements of heavy vehicles generating continues vibrations. Our buildings will be more prone to collapse and a disaster for us and to the state who will have to foot the repair bill. Effects of dust , noise and vibrations on animals and plants cannot be ruled out. In the long run animals will be unhealthy animals and plants will be unhealthy plants. People will loose there livelihood and land will become a dessert loosing our clean green image.
