Reasons comment:

There is an increasing demand for quality aggregate in the Canterbury region and Fulton Hogan is a socially and environmentally responsible operator, very able to meet this demand. The proposed site is in an ideal location for supporting the continuing rebuild and expansion of Christchurch City and the wider Canterbury area due to its proximity to arterial roads in all directions. The proposed new quarry will provide further employment to the city and give solidified job security to those already working in the industry. Given the right attention to detail, monitoring and planning the quarry should be able to exist without any detrimental effects to the surrounding community. Dust suppression and environmental monitoring are done very well by Fulton Hogan in comparison to some other quarry operators in the Canterbury region. We need this quarry to continue the enhancements in Canterbury's infrastructure for decades to come.

Consent comment:

I wish the consent authority to approve Fulton Hogan Canterbury's requests for all consents applied for in regards to the Roydon Quarry site.
