Reasons comment:

I live within 300 metres of the proposed quarry boundary and my concerns are the effect the quarry will have on myself, my family and our pets. I believe the air quality will deteriorate. The noise pollution from the quarry will make my lifestyle block feel like an industrial environment. I work in an industrial environment everyday and enjoy coming home to a more peaceful place. I am concerned about any additional heavy traffic using Jones Road. As it is now, with several potholes on both sides of Jones Road, there is very little safe driving room going past an oncoming truck. I believe the road will deteriorate even more with more heavy traffic. There has been many serious accidents close to our property and if the quarry went ahead I do not believe it would be safe for myself or my family to be on this road every day. My water supply is from a shallow well on our property and I am concerned that the water quality will be negatively affected by the quarry. Dust (including silica dust) is another major health concern for the health and me and my family. I believe that having a large, long term quarry so close will lower the value of my property. I have lived at my property for over 3 years and have poured my heart and soul into it - as well as quite a bit of money. I would be absolutely devastated to have to leave because of a quarry that will potentially be operating for the rest of my life, on my door step.
