Reasons comment:

The reason for my submission is that after reading the data available in the application documents and online that relates to this application, I believe that the quarry will have a number of measurable benefits, both direct and indirect on our community. The mitigation that Fulton Hogan has offered means that any effects on the environment and local community will be minor, or least than minor, and most certainty will be far outweighed by the economic and societal benefit that the quarry will have. I think it is extremely important for both Christchurch and wider Canterbury that this resource becomes available for the growth of our region, and Fulton Hogan has given me confidence that they will effectively manage this resource while acting with the community in mind.

Consent comment:

I want both Environment Canterbury and the Selwyn District Council to grant the consents requested, and for the Roydon Quarry to go ahead in its full scope as per the application submitted by Fulton Hogan Ltd
