Reasons comment:

With the growth of the Selwyn District, it is paramount that we as civil contractors have access to high quality aggregate close to our cliental to reduce costs. In the past ten years the population of Rolleston alone has gone from four thousand to over sixteen thousand and the business park in Izone is now a major employer in the Selwyn community . It is important to keep in mind that these quarries have to be close to any future development to minimise our carbon foot print, the further aggregates are carted the more pollution, wear and congestion on our roads.
