Reasons comment:

Templeton was chosen because I wanted a semi rural location which still had easy access to schools and the University. I believe that the positioning of such a large quarry so close to Templeton will have an adverse effect on the people and animals currently living here. The application provided does not adequately address these concerns. My main objections are:- 1. Increased lorry movements causing noise and safety issues plus there is an increased risk of stone chips on windscreens. I have had a number of these over the years. The most recent one occurred passing a quarry lorry on Chattertons Road in April 2019. The windscreen had to be replaced. 2. Increased dust especially on windy days. Both animals and people are affected by dust and the risk of respiratory disease is increased. 3. Increased noise. 4. Damage to the appearance of surrounding areas from quarry trucks. Please look at the appearance of rural roads such as Newtons Dawsons and Curraghs Road compared with Miners Road. I note that it is an offense under the Animal Welfare Act to cause unnecessary harm to animals.

Consent comment:

Not allow this application to proceed. If the application does proceed I request the following:- 1. A community liaison group be established with an independant chair. 2. Independant noise monitoring with agreed targets being set. 3. Independant dust monitoring with agreed targets being set. 4. Dust creating activity to cease when wind speeds exceed agreed levels. 5. Agreed permitted traffic corridors to keep the quarry lorries out of Templeton. 6. Landscaped soil banks all round the quarry at least 2m high. 7. Landscaping planted all round the quarry at least 4m high and 5m deep. 8. Compulsory covers on trucks when carry stones smaller than fist size. 9. Quarry operator to be responsible for repairing truck damage to the grassed areas alongside the roads alongside the quarry boundary.
