Reasons comment:

I am opposed to the quarry as I believe that it is far too close to existing homes in Templeton and the community in general - including schools/preschools!! There must be other areas that Fulton Hogan could quarry that are in more rural areas at a significantly greater distance from residential properties. This could easily set a precedent, if it was to go ahead, for future quarries to go ahead in other areas close to residential properties. My sister and her family (including two preschoolers who spend a lot of time outdoors and who suffer from asthma) would very likely experience negative health effects from the increased dust in the air and I am sure that they are not alone. Christchurch residents already experience more respiratory illnesses than other areas around the country and this can not help residents to have a quarry in such close proximity to their homes.

Consent comment:

To decline the application in full - and any such application in such close proximity to residential properties. I firmly believe that there should be restrictions as to how close to the residential properties quarrying activity should be able to be undertaken to prevent this from being an issue in other areas into the future, for the health and well-being of the residents of Christchurch.
