**Reasons comment:**

\*The position of the quarry site is too close to houses and businesses they will be affected by 1. Dust 2. Noise from quarrying 3. Noise from the vehicles 4. Fumes from the heavy vehicles 5. Unsightly effects on the landscape 6. Water used in an attempt to keep down the dust, causing a muddy sludge 7. Reducing the value of all houses and businesses who live nearby the proposed quarry site 8. Increased traffic from all the vehicles 9. The potential water pollution 10. Using good agricultural land \*the wider community and environment will be affected by 1. The increased traffic in a busy area 2. The dust 3. The unsightly effects of quarrying on the landscape 4. Excess water taken from the environment 5. The potential water pollution 6. Using good agricultural land \* some first hand experiences of quarries and quarrying 1. I live opposite a disused quarry and it looks a mess it is a haven for New Zealand pests and it isn't kept safely, having a big dead tree that could fall. It makes you question how will a huge quarry be put right and not left as an eyesore or safely. 2. Driving down towards Yaldhurst the road is very dusty and or sludgy from the number of lorries coming and going. \* I feel very concerned for all the residents who find themselves in close proximity to the proposed quarry site; for their health, wellbeing, quality of life and potential loss of money.

---

**Consent comment:**

Not to allow a quarry in such desirable agricultural site and so close to an established community. If it is allowed to minimise all noise, dust, pollution to its absolute minimum possible and to rectify the quarry when it finishes to look aesthetically pleasing.
