section ②

my reason for making this submission is we chose to live in Templeton, for being out in the country atmosphere, a quiet & relaxing place, little pollution, with clean country air, very little economic activity, we love this location for being close to the airport, Hospitals, Town Hall, Art gallery, city center, and all our entertainment we enjoy, plus enjoying our friends, a great Bus service we use often, as we are in the older age group.

we appose this application for this Quarry.

① Health Effects.

[REDACTED] I am very concerned about all the Dust that this Quarry is going to create. Such as settling on our Homes, soiling our cars, motorhomes washing, need to keep our windows closed, losing all our nice fresh air that circulates through out our home keeping it nice & fresh and dry, we also enjoy breathing. Just on our garden Plants, Trees, the effect it will have on small insects, bugs, bees, birds, animals Parks for sports, playground areas, from small children, teenagers, to Adults, we enjoy all our outdoor activities that are in Templeton and surrounding areas. I do not want to be sick and unhealthy from Breathing Dust.

We all have the right to enjoy our clean sunny environments. We do not want horrible dust soiling our clean areas, this also will be affecting the airplanes flight paths to and from the Airport, and visibility on the roads we travel.

What about a deadly Dust called Silicosis that stays in the air we breath, which in time causes death, Another health issue that comes from Diesel fumes in the air from all the Trucks travelling on roads,

Fulton Hogan the walkways & cycle you are supposed to be putting in around your country's of the Quarry for residents to go and enjoy using, is supposed to be a benefit to our village, not a Health Hazard from Dust, Noise, and Truck & Trailer movements.

② Noise.

I do not want to be having sleepless nights through all the noise coming from the Quarry machinery operating, as this is going to have an affect on our health & wellbeing, when we are sick needing Rest through the day, making a recovery and getting well again will not be easy. We already have a lot

of noise from empty truck & trailers pounding & rattling along the roads near by along with a lot of vibrations from the ground, we certainly don't need any more added to it. Once again disturbing all of our nature lives, along with all the dust that generates from these vehicles.

③ Water.

All the water you are going to be using in the Quarry what affect is it going to have in our area, seeping down under ground and travelling into our natural water supplies, which will contaminate it all, then our fish water plants are all infected, get sick and die, we have lovely fresh water to drink and swim in, and general use in our homes. We do not want to be using dirty water. Storage of Hazard materials in your yard leaks dripping on the ground from refueling vehicles along with engine oils, gives time seeping into the ground travelling down into our water ways and causing more pollution in the soil, & air.

④ Transport.

All the number of huge truck & trailer units travelling along the small country roads, the damage its going to do to them, Crossing intersections, then moving out onto the main highway creating a hazard for the motorists travelling North & South

Section ③

Should the Quarry be given Consent.

Conditions

That need to be put into Place.

- ① Hour of operating should be restricted to 10hrs a day including all Trucks & Trailers.
- ② 5½ days a week, with all statutory Holidays included.
- ③ All the Boundary's to have a sprinkler system in Place for Dust.
- ④ Water to be contained where vehicles and machinery is being washed Down.
Stormwater Diverted away from all contaminants areas
Portable Tankers brought in to refuel all machinery,
To be Placed on a Hard Surface area, with a dispenser fixed to contain spillage or dripping, (Similar to a drip tray) to prevent Leakage into soil.
- ⑤ Replacing all the soil and vegetation back to its original Place, when it was removed for working and operating this Quarry.
- ⑥ The need for inspector's to be in Place to ensure that the Company adhere's to the rules it signed up to.
