**Reasons comment:**

1. I am opposed to this quarry because of the potential effects of PM10 particulate and respirable crystalline silica dust generated and mobilised by quarry operation on the health of those living nearby and in the Templeton community. Given the nature of the Canterbury Plains geology, there must be other locations that are not so close to an existing dwellings. 2. I am opposed to the quarry because of its potential nuisance impact (from the operation of the quarry itself and the associated movement of vehicles) on those living nearby and in the Templeton community. 3. One of my daughters, her husband, their two grandsons and my ex-wife live in Templeton and I have concerns for their well-being if this consent were granted. 4. Granting this consent will set a precedent for similar operations close to other communities, potentially putting their well-being and quality of life at risk also.

---

**Consent comment:**

To decline the application in full.
