Stop the destruction of Christchurch's water !! Your poisoning our water with these Nitrate levels for the sake of those dam dairy cattle!! & if Ecan try & raise the acceptable level of Nitrates in our water, there will be blood. If you think Christchurch people will take this your wrong. You are simply putting a bulls eye on every cow in Canterbury. It's now getting to the stage we're we will take action, if you don't stop this stupidity.
