Subject: Plan Change 7 to the LWRP Submission
Date: Wednesday, 24 July 2019 8:13:12 PM

Your online Submission eplan portal is a disgrace. All I keep seeing is Java shortcuts and it crashes if I press on any of the "i" icons.

I have tried using google chrome, firefox and internet explorer and it crashes on all browsers. This does not make for an democratic process if submitters can't work out what any of the drop down options mean! I have no idea what drop down to select in your forms because the "i" button causes everything to crash... it is an absolute joke!

Nonetheless I oppose completely what you are trying to do with Christchurch fresh water. The level of nitrates are projected to increase about 7 -10 times in the Christchurch drinking water aquifer . This is not acceptable and needs urgent fast and immediate action. There MUST be Christchurch City representatives on the Zone Committee when big decisions are being made impacting Christchurch city water supply.

I oppose your plan. It needs to focus on fast and immediate actions to address nitrate levels which need to be presented to and endorsed by the Christchurch City Council.
