Hi Deanne,

Apologies for the delay. I've had a morning full of meetings and have only just had a chance to get to my emails.

I am hoping to get this application sorted by the end of the week. However, we still have 10 statutory days remaining to process this consent. I will do my best but I am not willing to guarantee that we will have it done sooner than this as there is always a chance that other issues will come up as I move on with processing the application. I will also need to have my report reviewed by a senior planner and then sent through to a decision maker which will depend on their availability. I am also awaiting a response from MKT (Mahaanui Kurataiao – Tangata Whenua Advisory Services) as I have requested external advice from them regarding works in a Runanga sensitive area. This should hopefully be sent through to me in the next couple of days.

I am currently working on a response to Simon Hedley regarding my decision on affected party status. Can you please be sure to include a new excavation map that shows exactly what is now being proposed? As you are only proposing to stockpile in the river bed can you please remove the reference to processing in the river bed. Once I have received this I will send it through to SOL so that they are aware of the new proposal.

Thanks,
Sarah

Good morning Sarah,

Thanks very much for your email yesterday evening - that's great news and glad to hear your discussion went well with Phillip. I am putting together the information we discussed and will have this in to you today as requested.

Based on this, would you be able to provide me with an estimated timeframe for Road Metals to receive a decision on their application, as requested below please? As you can see it is becoming very urgent with NCTIR chasing them for the rock supply. It would be much appreciated if there is anything you could do help this process.

Please let me know a suitable time to give you a call (I just tried however it went to your voicemail). Otherwise if you could please come back to us with the timeframe for now, that would be great.

Many thanks,
Deanne

EXTERNAL EMAIL

Hi Deanne, Sarah

NCTIR are chasing us and need to know when we can be in the Clarence providing rock, what can I tell them?

Regards
Dan

Hi Sarah

Thanks for the call earlier today.

Following on from the discussion around rule 7.35 and the need for an air discharge consent, we will address this for you. However, our understanding is SOL is relying on their global consent to operate in the river, which is at the link here.

<https://www.ecan.govt.nz/data/consent-search/consentdetails/CRC184928/CRC184928>

They would appear to be unable to do this per condition 2 and the associated definition.

Could you please confirm?

Many thanks,
Deanne
