Subject: Plan Change 7 to the LWRP Submission

Categories: Cathy

Not on my watch!

How dare you threaten the drinking water quality of the residents of Christchurch. Thousands could develop cancer from any increase in nitrates in our water. You should be working hard to reduce the nitrates leaching into our groundwater.

There must not be a higher rate of nitrates allowed, you know it takes years to get into the water, are you hoping you will all be dead before the problem you are creating is discovered?? When the cancer rate escalates so high the government of the day steps in and asks "who allowed this to happen". Stop it now and think of your children and grandchildren, they could be the envy of the world if you help protect their future drinking water. Why are you even called Environment Canterbury, you are killing our environment. I am so disgusted you could think about passing this plan change. We do not need more dairy, we do need healthy people.

Sincerely

Craig Burke

Hello,

I'm a resident here in Christchurch and I've been watching from the sidelines hoping that you, your staff and the elected members can do what your values state.

Have you read them recently?

Our values

Environment Canterbury adheres to a strong set of values that underpin the way we work towards our desired outcomes. They are:

- People first | *Manaakitanga* – people, customers and staff come first
- Collaboration | *Whanaungatanga* – together works best
- Stewardship | *Kaitiakitanga* – good decisions today for tomorrow
- Integrity | *Pononga* – trust in us and our information
- Can do | *Māiatanga* – be brave and make it happen.

The proposed plan 7 change and the way it is being entered into being is not stewardship, Integrity and certainly not people first.

The world is fast becoming a toxic mess and plan 7 will just add to the toxic mess.

Nitrate levels being allowed to raise is a crazy stupid idea that science has already proven is poisonous to the environment and people consuming the water.

Christchurch has a precious asset that is world renowned. Do you want to be the organisation that allowed a change to a plan screw up our water for generations to come. Do you have children? Will your children have children? What legacy are you going to leave for your family?

Wake up, stand up and live your values.
Do not raise the nitrate levels.

Craig

Subject: Re: Incomplete Submission on Proposed Plan Change 7 to the Land and Water Regional Plan
Date: Tuesday, 10 September 2019 6:37:50 PM

Hello Tavisha,

I've been informed that I don't have to specifically talk to sentences or data in the plan change.

I do not have any commercial or business interests that are associated to the plan change, therefore I don't stand to gain from this change either way.

Perhaps something I will gain is a good level of health or not, depending on what is decided.

Or perhaps my household will be poorer in the future as we'll have to fund purifying the toxic water?

My wish is that the nitrate levels in our pure water source are not increased. In fact they should be reduced.

It is vital that Christchurch aquifers continue to have a low level of nitrates. I understand from the City Council's submission that there is major damage to the ecosystem and stygofauna above 0.44mg/l and there is a comprehensive Danish study which links nitrate levels above 0.87mg/l with an increase in colorectal cancers. The health impacts of these massive increases in nitrates have not been considered in the report, either on the ecosystem or on human health and yet Ecan considered the Danish report robust enough to ask the Ministry of Health to do further research on this. I would expect the water source protector to take a precautionary approach on this

Do the right thing ECAN. You need to sort this mess out. Dairy farming on the land proposed for change needs to be reduced not increased.

Thank You

Craig Burke

Thank you for your submission on Proposed Plan Change 7 to the Land and Water Regional Plan.

We note that your submission does not include all of the information required under Clause 5 of Schedule 1 of the Resource Management Act 1991.

Please confirm which sentences apply to you in relation to the Trade Competition submission on [this form](#) (also attached).

In line with the attached form we also require you to confirm whether you wish to be heard in support of your submission and if so whether you would be prepared to consider presenting your submission in a joint case with others making a similar submission at any hearing.

Here are some [guidelines](#) which you may find useful when making a submission.

We look forward to your response.

Nga mihi
