Subject: Submission to: ECAN Proposed Plan Change 7 - Land & Water Regional Plan
Date: Thursday, 12 September 2019 11:34:57 PM

We are submitting to the Plan Change for the following reasons:

- 1.No-one has the right to destroy the pure aquifers that run under Christchurch City and provide the best drinking water of any city in the world.
2. ECAN should be acting to protect the city's water at all cost.
3. The health, environmental and financial costs of this change are huge and fall on the people of Christchurch who will get none of the financial benefits of the farming in the Waimakariri area.
4. Protection of the aquifer needs to happen immediately and nitrates MUST be reduced dramatically so they do not exceed a level of less that 1mg/L.

Sincerely
Allan and Judy Stack
100 Port Hills Rd
Heathcote Valley
Christchurch
