Submission:

I strongly oppose any increase in the minimum flow of the Opiki River. Simply... an empty lake means poorer water quality and associated in stream values.

I support the role of OEFRAS which has proven a very valuable community group to best manage river flows in times when the minimum lake level is threatened.

I have lived by the river for over sixty years and held a fishing licence for probably 50 of those.

There is no doubt the
Dam and its management have been
a huge success for the river
and its community.

Please don't compromise
what has been achieved.

Yours faithfully,

Jeffrey Pearse.
