(1) The specific provisions of the Proposed Plan that my submission relates to are:		(2) My submission is that:  (include whether you support or oppose the specific provisions or wish to have them amended and the reasons for your views.)		(3) I seek the following decisions from Environment Canterbury:  (Please give precise details for each provision. The more specific you can be the easier it will be for the Council to understand your concerns.)
Section & Page Number	Sub-section/ Point	Oppose/support (in part or full)	Reasons	
(3) Proposed Nitrate Priority Sub Areas Map		Oppose (in part)	These proposals, time frames, & zoning are too inflexible; need to be analysed and reviewed within shorter time frames, taking into account all activities and changes impacting on the water quality eg, non farming inputs and land use, urban, lifestyle, industrial practices, soil and water level changes, vegetation and all elements that contribute to environmental outcomes. This rigid long term set rules, computer generated theoretical approach may well drive even organic farmers like ourselves off the land which will probably be taken out of sustainable food production to land banking, lifestyle or foreign investment. Yes, change is desperately needed and with true wisdom & foresight.	It is the recognition, and acknowledgment of previous 'excessive growth and 'scorched earth' policies that have landed us all in this unsustainable mess, that needs to be presented and countered. Smaller family farms properties that are planted & nurtured need to be able to physically & financially survive. If New Zealand and its lands, flora and fauna are to survive. Please listen.
