This submission was submitted via Environment Canterbury's online submission portal. The Submissions portal generates pdf files of submissions (as attached). However, some of the information that appears in the pdf files is not consistent with information the submitter entered into the portal, specifically, where submitters have ticked:

- "I wish to be heard in support of my submission" ; and
- "If others make a similar submission I will consider presenting a joint case with them at a hearing".

Additionally, the submissions portal has generated submitter and submission point numbers that are not consistent with the numbering applied in the Summary of Decisions Requested. Submission points in the Summary of Decisions Requested (SODR) are numbered using the following format:

PC7 – Submitter ID #.Submission point #

The correct submitter identification number and submitter information is specified above. This will be the number referred to in the SODR.

Point 23.1

Submission

As a keen freshwater fisherman I would like to see Policy 4 . 102 wording changed to. (New polices direct that safe passage of trout, salmon and indigenous fish through in stream structures is to be provided for.) the reason why i want this changed is so trout and salmon are still able to freely gain access to all our waterways for myself and future fishing people .

Relief sought

4.102

Structures enable the safe passage of Trout, Salmon and indigenous fish, while avoiding as far as practicable, the passage of any invasive, pest or nuisance fish species by:

1. the appropriate design, construction, installation and maintenance of new in-stream structures; and
2. the modification, reconstruction or removed of existing in-stream structures.

Section: Section 4 Policies

Sub-section: Section 4 Policies

Provision

4.102

Structures enable the safe passage of indigenous fish, while avoiding as far as practicable, the passage of any invasive, pest or nuisance fish species by:

- a. the appropriate design, construction, installation and maintenance of new in-stream structures; and
- b. the modification, reconstruction or removed of existing in-stream structures.
