

## **Submission on Plan Change 7 to the Canterbury Land and Water Regional Plan**

By **Armstrong, B**

Submitter Identification number: **PC7-520**

Wishes to be heard: **No**

Would consider making a joint submission at the hearing: **No**

Submitted on: **08/09/2019**

This submission was submitted via Environment Canterbury's online submission portal. The Submissions portal generates pdf files of submissions (as attached). However, some of the information that appears in the pdf files is not consistent with information the submitter entered into the portal, specifically, where submitters have ticked:

- "I wish to be heard in support of my submission" ; and
- "If others make a similar submission I will consider presenting a joint case with them at a hearing".

Additionally, the submissions portal has generated submitter and submission point numbers that are not consistent with the numbering applied in the Summary of Decisions Requested. Submission points in the Summary of Decisions Requested (SODR) are numbered using the following format:

PC7 – Submitter ID #.Submission point #

**The correct submitter identification number and submitter information is specified above. This will be the number referred to in the SODR.**

### Point 38.1

#### Submission

I am opposed to any provision of Policy 4.102 that may result in the control or elimination of trout or salmon from any river.

There is a puritanical lunacy in DOC and now perhaps Ecan that wishes to compel New Zealand to return to some "Garden of Eden" state that existed prior to human settlement. They view all noxious species whether they be animal, fish or plant as "evil" and seek to remove them from the environment by any means including toxins, poisons, chemicals and now potentially physical controls in waterways.

These people are contaminating our environment and seek to destroy our back country recreational heritage.

They have a Nazi like "final solution" attitude to all but native species and appear to think they are some kind of God.

The existence of all introduced species in New Zealand, whether by deliberate or inadvertent introduction, is part of the evolution of nature on our planet and nature will always find it's own balance.

#### Relief sought

No physical controls on waterways to eliminate trout and salmon
