

Kia Ora Sharon and Yvette,  
Our apology for late response.

Planetary Healing Foundation submission  
to minute 5 is as follows :-

" P.H.F. agrees with the new wording,  
provided that all or any 'critical  
'zones' produced by low intensity  
irrigated farming and dryland farming  
are adequately contained and  
robustly buffered from waterways  
by riparian strips or a 'wood chain'  
generous and wide enough to  
accommodate primary, secondary  
and canopy trees with deep tap  
root systems."

Thankyou Peter Clark. (secretary)  
P.H.F. INT.
