Reasons comment:

I am appalled that in today's enlightened times regarding the environmental destruction wrought on our marine environment, that such an application should even be made. Part of

the application is to take ground water basically to mix with the discharge material to "water it down". Any take of ground water is opposed as it further serves to lower the water table, a water table that is already depleted and not recharging itself due to climate change and over extraction by farming interests. I oppose the application to discharge any amount of effluent into the marine environment, small or large. This company is owned by a Chinese parent company that has, by its own admission on its company webpage, over 1000 dairy factories in China. It is rich enough to provide for 100% on shore disposal of any and all effluent. Don't allow foreign owned interests to come over here and rape our marine environment. Any discharge of pollutants into the marine environment is a discharge of toxic materials and as such must not be allowed. You, ECan , are the representatives of the people. It is YOUR duty to protect the people environment. DO YOUR JOB FOR ONCE !!!!
