Reasons comment:

I object on behalf of the environment, this is a disgrace, our environment is already in trouble, and a large factory wants to discharge alot of contaminants directly into a very

important part of our marine environment. We, as a society of intelligent humans, can no longer allow the polluting of our environment, for the sake of an overseas companies financial gain, it is in the best interest of our children, and our future that we conserve what remains of our environment. 300 metres off shore? What will happen to the remaining eels, dolphins, salmon and other wildlife clinging to life off our South Canterbury / North Otago coast?

Consent comment:

Do not allow this pipeline to go ahead and cause irreversible damage to our coast and marine life. Oceania should buy more land and apply what they need to onto land, in the hope that it will filter out most of the contaminants.
