We have found it really hard to find how to submit against this application. Please consider late submissions.

Oceania Dairy Ltd has lodged six consent applications with Environment Canterbury for the construction of the pipeline that would allow it to discharge up to 10,000cum of treated wastewater into the sea per day. I am writing to voice my opposition to this consent application. Further development of dairy needs looked into anyway, but developing by discharging into the ocean sounds fundamentally wrong. Please do not grant consent. Environmental impact needs to be thought of. Clearly land disposal is unpalatable, the ocean is not an answer, just a deferral. Many thanks Regards Trudy Mckay
