**Reasons comment:**

As a concerned citizen, I am writing to object to the Oceania Dairy Limited proposed construction of a 7.5 kilometre pipeline to discharge wastewater into the coastal marine

area. Human beings should not be discharging any of our wastewater into our rivers and oceans. No wonder our waterways are so polluted; no wonder we experience droughts every summer. Our wastewater should be discharged on land only. Our human activity is creating climate change. Firstly, taking water from our land environment results in drought conditions for our land. Secondly, discharging our waste into our waterways is creating pollution in our rivers and oceans. As humans, we have to change our ways of thinking. Oceania Dairy have stated this is a solution so that locals don't experience distasteful odour from the wastewater treatment ponds. A little bit of odour in the hot weather is something we should get used to. We (humans) are in our current predicament because we are so far removed from a natural state of living, that we expect everything to be sanitised for our delicate sensitivities. Meanwhile we can't drink from our rivers and we can't swim in our oceans.

---

**Consent comment:**

I propose the consent authority decline Oceania Dairy Limited proposal and give them permission to create odour by discharging their wastewater into their existing treatment facilities.
