**Consent support/hearing details**

- CRC194459: oppose | NOT to be heard | will NOT consider joint hearing

---

**Reasons comment:**

We operate a self storage business located approximately 150m south of the Tegel processing plant. We have concerns with the discharge of contaminants into the air. This discharge, particularly odors often travel to our property. The odor can be off putting to prospective and current clients of ours. At times we have noticed an increase in dust/soot in the atmosphere due to the discharge into the air environment. There is a caretaker residence located at our property. With the current discharge, it is not uncommon for the residents to close all windows to mitigate the odor. The surrounding area is rapidly developing with retail and commercial becoming more prominent. With this comes a

higher concentration and frequency of people coming to the area where the discharge occurs. We consider the impact of the discharge into the surrounding environment not less than minor as described in the assessment of environmental effects. The discharge of contaminants will have adverse effects on the surrounding environment, particularly in the creation of odors into the atmosphere.

---

**Consent comment:**

We seek for the local governing body to deny the application sort. Stronger regulations are to be imposed in order to mitigate the discharge of contaminants into the surrounding environment.
