

LIMITED NOTIFICATION – 27 November 2019

Resource consent application: **CRC194083 – to discharge contaminants to air**

Applicant: Waste Management NZ Limited (“WMNZ”)

Address for service: Tonkin + Taylor
PO Box 13055
Christchurch
Attn: Richard Chilton
Email: RChilton@tonkintaylor.co.nz

The Applicant proposes to establish a waste processing and stabilisation facility at 305 Marshs Road, South Hornby, Christchurch (as shown in figure 1), adjacent to its existing transfer station at 301 Marshs Road. The Applicant is applying for a resource consent from Environment Canterbury to discharge contaminants into air from the site. A resource consent duration of 35 years is sought.

The proposed waste processing and stabilisation facility will receive a variety of wastes that are typically unsuitable for direct disposal to landfill or trade waste due to the properties of the waste. The treatment processes will produce stabilised solids for disposal to consented landfill or waste water for discharge to the trade waste network within the parameters of a trade waste consent. The majority of activities will occur within a purpose-designed building with process controls to minimise the discharge of contaminants to air. No retail activities are proposed at the site.

Submissions Close: Friday 17 January 2020
