**Reasons comment:**

In order to prevent catastrophic climate change, we need to change the way we operate.

This includes stopping coal mining. There are other options for Fonterra to heat their plants - which are much more climate friendly. Environment Canterbury should decline these consents to show that it is properly committed to reducing carbon emissions in line with the Zero Carbon Act. Bathurst do not have a good environmental record - they have consistently breached their consents, so should not be granted any more. The local community will be affected by noise, dust, pollution of local waterways, degradation of landscape values and the loss of amenity values. It is not right for Bathurst to make a profit while the local and wider community will suffer from the negative environmental effects.

---

**Consent comment:**

I want all of these consents declined in their entirety
