Subject: Bathurst Resources mine consent for Coalgate operations
Date: Saturday, 16 May 2020 12:48:21 AM

To who it concerns ,
With regards to the new consent for mining coal at Bush Gully Rd, Coalgate. we 'Canterbury Line Boring Ltd' are in support of the new consent in process . As a small Canterbury Business based in the Selwyn district, we work out at Coalgate mine sometimes repairing Bathurst mobile equipment onsite ,
We have always noticed how well run the operation is in respect to conservation ,
Safety And respect for their neighbouring
Properties. We always see dust Suppression water trucks driving the road into the mine . When entering the mining area it is very visible how Bathurst are making a great job of containing all the water run off from any Coal , it looks as if they have spent a lot of money building a water holding dams and good draining systems .
We back Bathurst 100 per cent it's great to see the company making a good go of a hard place to mine
And doing it on a professional level.
Canterbury needs more company's like this ,
It provides good work and employment for a lot of people in our district.
Regards
Jim and Sharon Honeywill
