Reasons comment:

I am appalled that we are still making milk power using coal as an energy source. Climate

change is a serious and increasing problem. Adding more CO2 to the atmosphere by burning air polluting coal borders on wilful disregard of the problems it is causing and a very long way from being "clean and green"! I believe that it is your duty as a world citizen and representative of New Zealand people, that you do not allow any expansion of this mine. Further more, I believe that it is your duty to your fellow citizens and future generations to come, to work towards reducing the use of all coal burning for any purpose. There are alternatives and these create jobs too.
