**Reasons comment:**

I don't want any coal mining in Canterbury because we are in a human induced Climate

Emergency ! It is madness to want to extract fossil fuels that are dense forms of carbon, safely locked underground. Currently our atmosphere has an excess of greenhouse gasses. To use carbon, to dig up carbon, to then release more carbon is stupidity and selfishness at it's highest level !! Another reason is Bathurst has a very poor environmental record, they simply cannot be trusted. The mine was fined last year pouring effluent into local streams where the endangered mudfish live, and it's breached its consents multiple times before that.

---

**Consent comment:**

I don't want the coal mine in Canterbury to get bigger because coal kills the climate – it's crazy to increase coal production right now!
