Reasons comment:

As a member of the local community and an employee of Bathurst Resources at

Canterbury Coal I would like to put forward a recommendation that the company be allowed to continue operations at the Canterbury Coal Mine. Apart from being a highly supportive employer from a personal point of view, Bathurst Resources is also of great benefit to the local community. Many of the people that work at Canterbury Coal live locally and have children that attend the local school, resulting in a very community minded culture within the company. Apart from the obvious economic benefits to the community from having local residents employed at the mine is the great training undertaken by the company. Bathurst believes in constantly growing its employees' skill sets through a multitude of training courses ranging from one day health and safety courses right through to full apprenticeship programs. Included in this training regime is the establishment of an Emergency Response Team. The primary duty of this crew is of course to respond to any potential incident at the mine. However such training doesn't stay at the workplace and the result is a number of the local community are now professionally trained to respond to a huge variety of emergencies. There will sometime in the future be a Civil Defence Emergency declared in the local area and having a well trained and equipped population supported by strong local businesses is the best way to save local lives.
