Reasons comment:

I know we are in a recession but we are also in a climate emergency and we must stop

using fossil fuels, not use more!! You and Fonterra and other big coal users need to wake up and read the writing on the wall, we are destroying our planet and if you think this pandemic is bad for the economy watch this space as more climate disasters will cause even more damage to the economy. You also need to wake up and realise we have to have a sustainable economic plan and that means economic growth is an outdated Capitalist concept that needs to go. When the last tree has been cut; when the last river has been poisoned; when the last fish has been caught; then we will realise we can't eat money" Think outside the square for answers to jobs. For example we need to develop renewable energy and that will create new jobs. The fossil fuel industry is redundant. Leave the coal in the ground. We must live in harmony with nature or face inevitable disaster caused by Co2 suffocation and global warming, causing runaway climate change. Listen to the youth, it is their future you are destroying. Think of your grandchildren, do you care if they have a future or do you want to go ahead with coal and destroy their future. Stop your selfish greed , educate yourselves and learn social justice, it is not too late to redeem yourselves from your crimes against humanity. Yes it is criminal behaviour to excavate and use coal and contribute to runaway climate change.

Consent comment:

Close the coal mine.
