Subject: HPE CM: Bathurst Coal Ltd - submission
Date: Saturday, 2 May 2020 1:36:51 PM

I oppose all of Bathurst's consent applications. I find them all inappropriate in the modern world. For climate change reasons alone, this coal needs to stay in the ground.

Their application to increase coal output is inconsistent with the stated aims of Fonterra, the major consumer of this coal, who seek to reduce coal use.

Their application to destroy wetland must be against the stated aims of regional policy in Canterbury where very few wetlands remain.
