Subject: Submission against the Canterbury Coal Mine expansion
Date: Friday, 15 May 2020 9:57:22 PM

Dear ECAN

I implore you to decline Bathurst's application for an expansion to the Canterbury Coal Mine. We are in a time of covid-crisis and climate crisis; the country - and the world - needs to turn away from fossils fuels and other business as usual projects and instead provide for employment that meets the needs of people and planet. Canterbury can lead the way in this by declining this application and instead investing in public transport, housing, and your other hopes for Canterbury.

I have seen Bathurst's work on the Coast and it is devastating.

Aku mihi nui and I hope you are all safe during these turbulent times
Frances Mountier
